André Breton, Œuvres complètes, index allégé avec références de pages.

La puissance croissante de nos ordinateurs ne nous autorise pas à assommer le lecteur de données brutes et indigestes. Sans revenir aux débats des temps primitifs sur les « inventaires ouverts » et « inventaires clos », l'opposition « vocabulaire lexical » vs « vocabulaire grammatical », je me suis permis de supprimer de la sortie d'ordinateur les trop hautes fréquences qui, dépassant un affichage de trois écrans, entravaient toute lecture et toute observation.
Voici la liste des formes écartées :
a, à, des, et, etc., faire, fait, faut, je, l' la, le, les, lui, m' mais moi n' ne, ni nous, on, ont, ou, où, par, plus, pour, que, qui, sa, se, ses, ta tu, un, une, (ainsi que la ponctuation).
Il est bien entendu que le logiciel a fait son travail sans omettre aucune occurrence. Les références de pages concernant ces mots sont à la disposition de qui me les demandera.

Le tableau se lit ainsi : forme, page (volume en chiffres romains et page en chiffres arabes dans l'édition de la Pléiade), titre du recueil en abrégé. L'inventaire des dates est reporté à la fin.

C'est la totalité du texte signé André Breton qui a été traitée par la machine, y compris les citations (à la différence des données FRANTEXT, par exemple).

Rappelons, pour parer à toute objection, qu'un index ne dispense pas de la lecture des textes. HB
